

1 Wchodzimy na stronę <https://www.postgresql.org/download/> i wybieramy na jaki system operacyjny ma być postgres

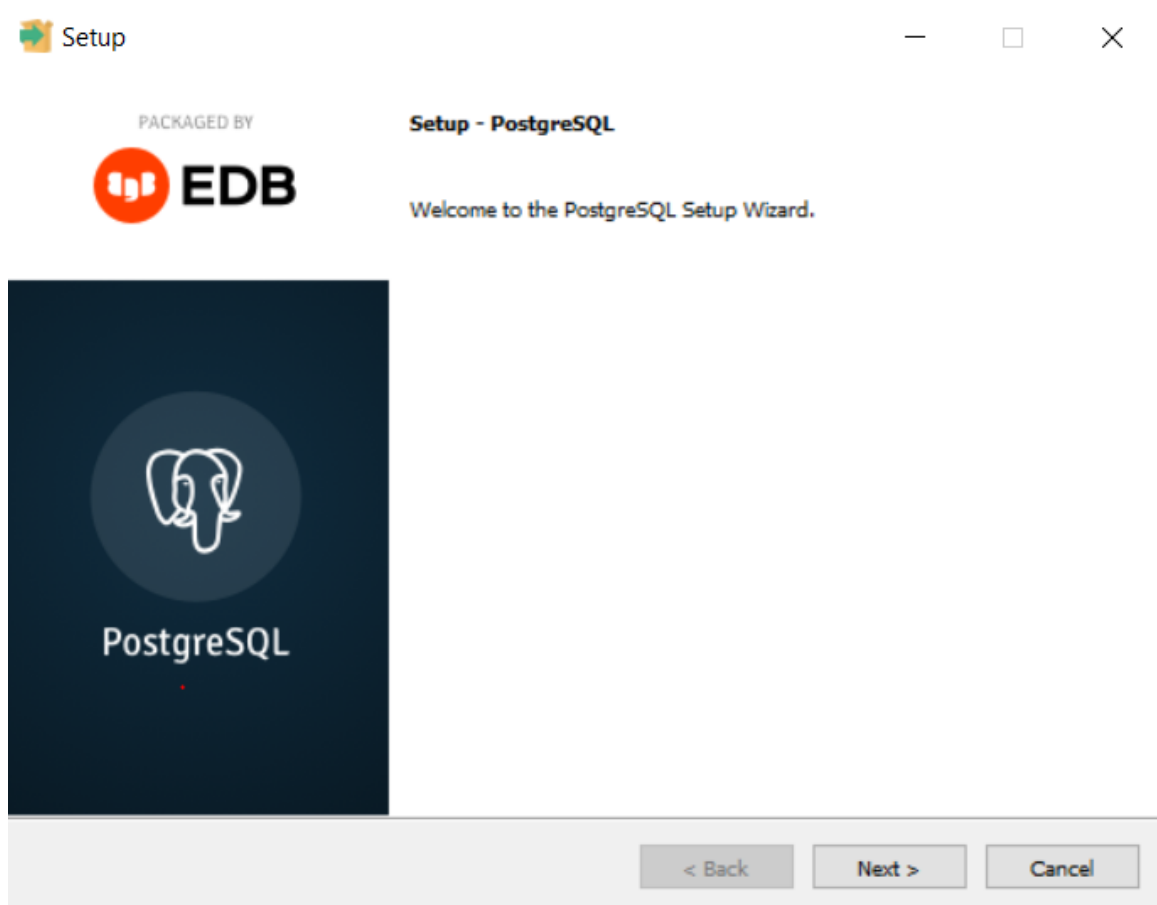

2 Po wybraniu systemu klikamy download the installer

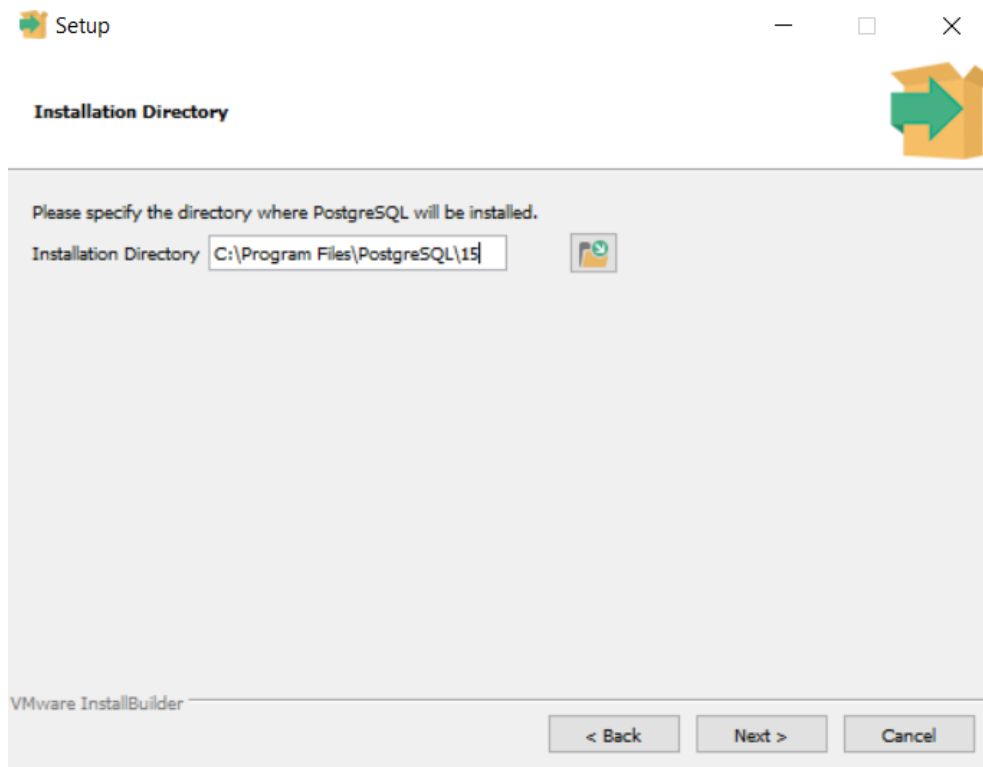

3 Następnie wybieramy i pobieramy installer dla naszego systemu

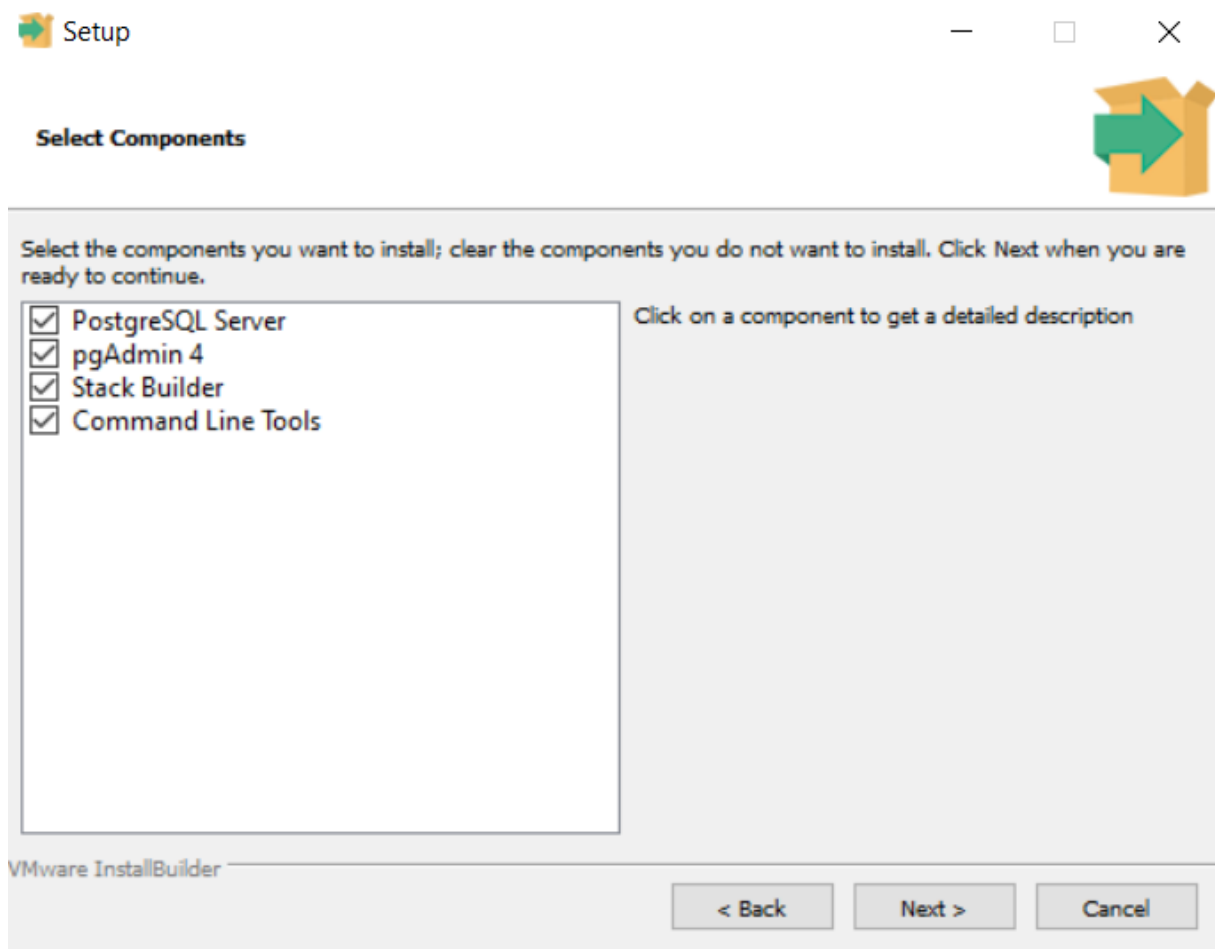

4 Po pobraniu i uruchomieniu instalatora klikamy next

5 Teraz wybieramy gdzie ma być zainstalowany nasz program

6 W kolejnym kroku naciskamy next

7 W kolejnym kroku wybieramy gdzie mają zapisywać się nasze bazy danych

8 Tworzymy unikalne hasło dla superuser

The screenshot shows a window titled "Setup" with a standard Windows-style title bar (minimize, maximize, close buttons). The window has a light gray background. In the top right corner, there is a large green arrow pointing right, overlaid on a yellow box. Below the title bar, the word "Password" is displayed in bold. The main area of the window contains the text "Please provide a password for the database superuser (postgres)." followed by two input fields. The first field is labeled "Password" and the second is labeled "Retype password". At the bottom of the window, the text "VMware InstallBuilder" is visible on the left, and three buttons labeled "< Back", "Next >", and "Cancel" are on the right.

Setup

Password

Please provide a password for the database superuser (postgres).

Password

Retype password

VMware InstallBuilder

< Back Next > Cancel

9 W tym kroku należy wybrać port można zostawić domyślny podany przez instalator „5432” ale trzeba uważać żeby nie było kolizji portów

The screenshot shows a window titled "Setup" with a standard Windows-style title bar (minimize, maximize, close buttons). In the top right corner, there is a large green arrow pointing right, overlaid on a yellow box icon. Below the title bar, the word "Port" is displayed in bold. The main area of the window contains the text "Please select the port number the server should listen on." followed by a text input field labeled "Port" containing the value "5432". At the bottom left, the text "VMware InstallBuilder" is visible. At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel".

Setup

Port

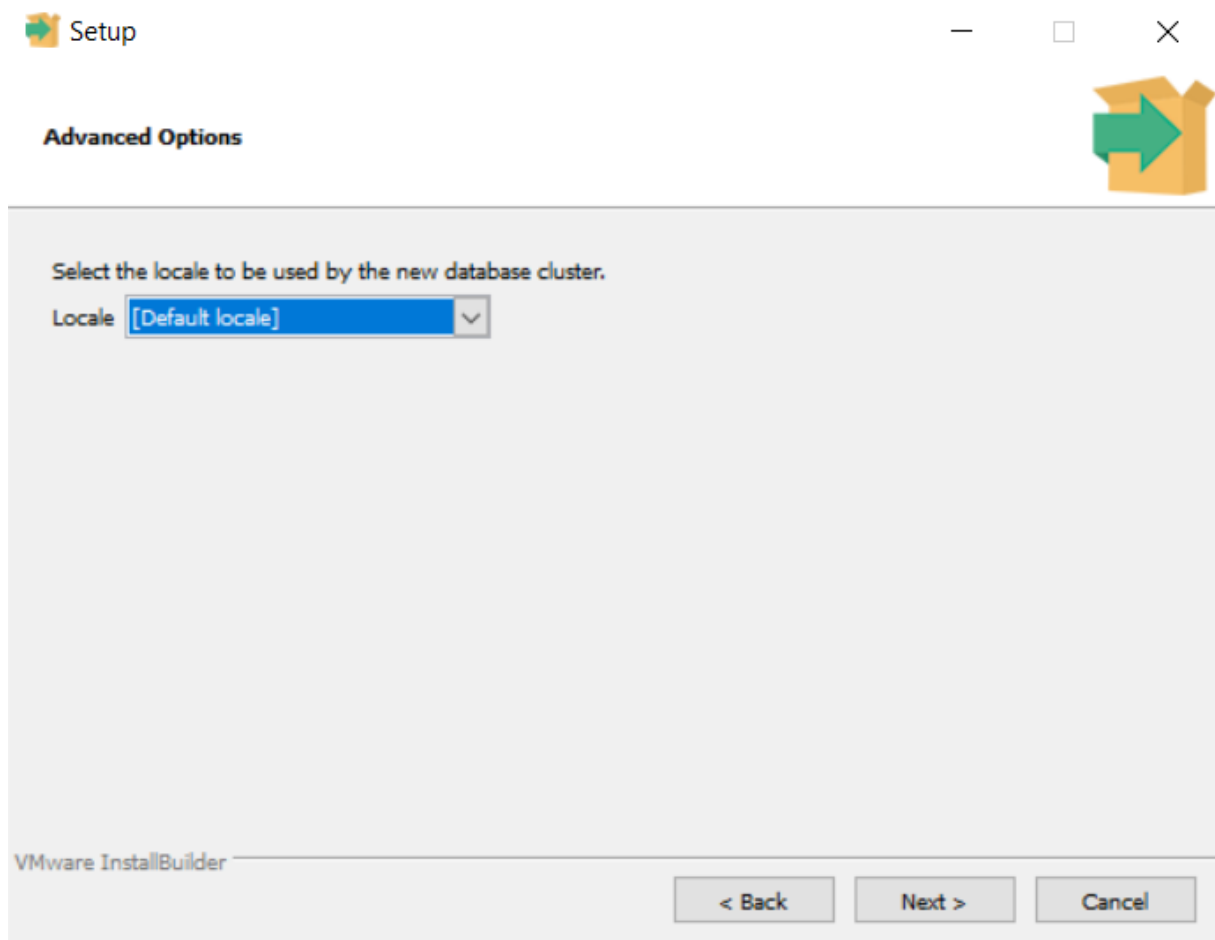

Please select the port number the server should listen on.

Port 5432

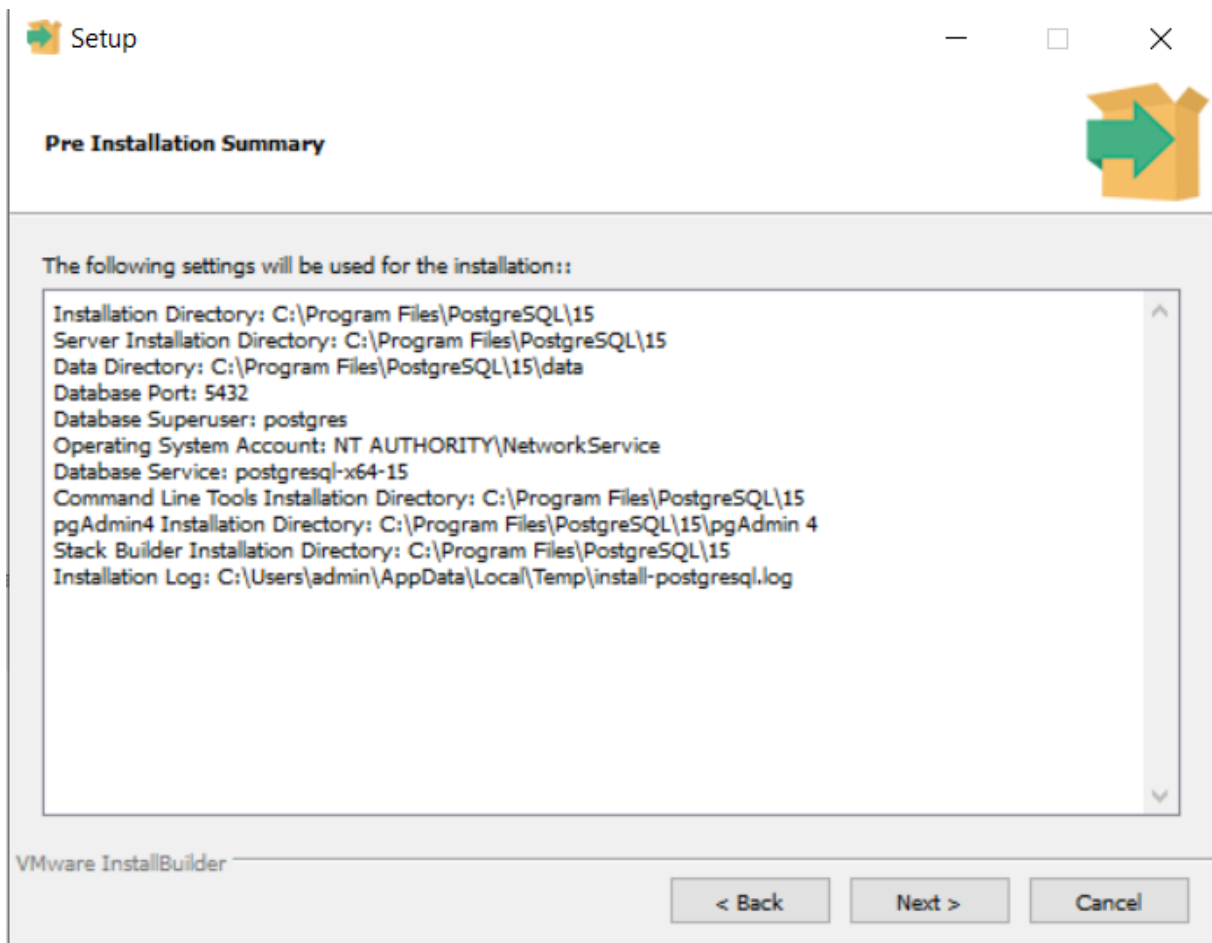

VMware InstallBuilder

< Back Next > Cancel

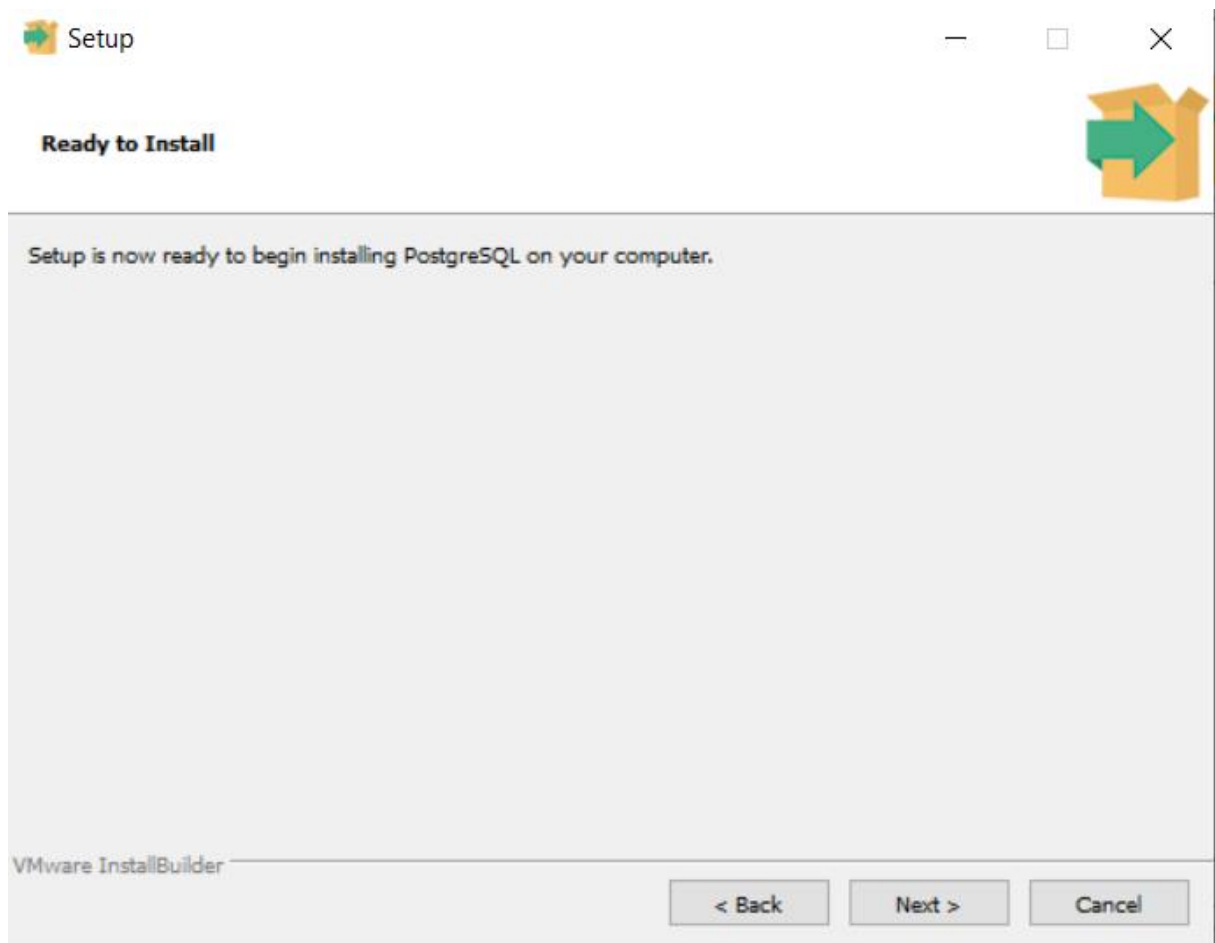

10 Następnie trzeba sprecyzować lokalizację

11 Instalator wyświetla podsumowanie

12 W tym kroku next

13 Koniec pracy instalatora
